

**... WAIT A MINUTE!!**

Evaporation goes up  
Condensation stays there  
Precipitation goes down

**Repeat**

**EXCEPT WHEN IT DOESN'T REPEAT...**

Sometimes water gets trapped in a water bottle with the caps on-  $H_2O$  molecules are taken prisoner!

**Please help us!**

**HOW?**

*In the cafeteria if you have extra water, take the cap off and pour the water into our special container.*

*We will put the water in our school garden.*

Thank You - AWEBOTS
